New Course: Designing PEX Plumbing Systems

PPI announces availability of a new one-hour continuing education course.

“Designing PEX Plumbing Systems to Optimize Performance and Efficiency” demonstrates how PEX plumbing systems can improve the health, safety and welfare of building occupants through reliable and efficient delivery of safe drinking water. Course content is based on PPI’s [Design Guide: PEX Water Supply Plumbing Systems](#) and provides information to help optimize system performance.

PPI has been approved as an **ASPE CEU Provider** and an **ICC Preferred Provider**. This course is approved by both organizations for continuing education credits.

Access course information directly by clicking this link:
