PLASTICS PIPE INSTITUTE GROWING --
EMPLOYMENT OPPORTUNITY ANNOUNCED

IRVING, Texas – April 8, 2015 – The Plastics Pipe Institute, Inc., (PPI) announced today that it has an open position and is actively seeking a qualified engineer for its Building and Construction (BCD) and Conduit (CD) Divisions.

President Tony Radoszewski shared the addition is a direct response to the trade association members' commitment in market segments in which growth is clearly envisioned. "Yes, our member companies are feeling positive about the future and we are seeing continuing improvement in the overall economic environment. While clearly there's a lot more work to do, adding this new, key team player helps us better align for current and future marketplace demands. Radoszewski continued, "As PPI's spokesperson in these dedicated industry sectors, this individual will be visible, active and collaborative within other industry organizations, standards and code bodies, and in forums where forward-thinking leadership is vital."

Reporting to the PPI President, the Engineering Director, BCD and CD will be responsible for technical, marketing, developmental and educational outreach programs. A ten-year level of related engineering experience is required. Full position summary requirements, along with the details for applying can be found on the PPI website: www.plasticpipe.org.

About PPI:

The Plastics Pipe Institute Inc. (PPI) is the major trade association representing all segments of the plastic pipe industry and is dedicated to promoting plastics as the material of choice for pipe applications. PPI is the premier technical, engineering and industry knowledge resource publishing data for use in development and design of plastic pipe systems. Additionally, PPI collaborates with industry organizations that set standards for manufacturing practices and installation methods.
